Ask ChatGPT about your brand before your customers do

India is now ChatGPT's No. 1 market by weekly users.

ChatGPT Gemini Perplexity

Swipe →

01

Ask what a buyer would ask.

"Best [category] brands in India under ₹[price]?"

Are you in the list? If not, who is, and why?

02

Ask about you by name.

"What do people say about [brand]? Pros and cons."

Look for old prices, wrong facts and complaints you fixed long ago.

03

Ask it to compare.

"[Your brand] vs [competitor]: which should I buy and why?"

Those reasons are what your buyers hear.

04

Check where it gets its info.

"Which sources did you use for this?"

Review sites, marketplaces, articles.

That's where you need to show up.

05

Fix what it can read.

Real prices in ₹. Honest FAQs. Clear specs. Reviews on your site and your listings.

Vague pages get vague answers.

06

Repeat it every month.

Same prompts. Same 3 tools. Note what changed.
